Summary of the DAC Meeting:

Minutes of the meeting held on 26-08-2026 and the following points have been discussed.

- ❖ The convenor welcomed all the DAC members.
- ❖ The candidate was asked to give a brief presentation about the work carried out so far.
- ❖ The candidate presented the proposed research topic “**Slack-Free Lagrangian Constraint Handling Against Slack-Based Methods for Reducing Qubit Overhead in Quantum Combinatorial Optimization**”.
- ❖ The following points were discussed by the DAC members:
 1. The proposed research on the disease detection of wheat was found relevant and significant, and research directions were provided to the candidate.
 2. The members suggested to study quantum computing first, as the proposed research requires it, and then proceed with the research.
 3. The convenor suggested to use numerical data instead of image data for disease detection and to attend more FDPs.

The following courses were suggested by Doctoral Committee Members:

1. Research Methodology
2. Research Publication and Ethics
3. Quantum Machine Learning (Self Study Course)
4. Quantum Optimization (Self Study Course)
5. Foundations of Deep Learning: Concepts and Applications (NPTEL Online Course)

All courses will be assessed through Continuous Assessment Tests and a Final Assessment Test as per VIT norms.
